🚀 Projects

Sign Language Detection System

- Developed a real-time ASL gesture recognition system using Python, TensorFlow, and OpenCV.

- Implemented data collection, visualization, classification, and real-time detection phases.
- Achieved high accuracy in recognizing hand gestures for accessibility applications.

Library Management System

- Designed a Python-based system to manage library books, users, and borrowing activities efficiently.
- Used Tkinter for GUI development and SQLite for database management.
- Implemented user authentication, book search, and borrowing/return modules.

Education Management System (Using Odoo)

- Developed custom modules for managing students, admissions, and academic records.
 - Implemented models, list views, and form views using Odoo ORM and XML.
 - Designed workflows for managing student admission and academic data.
-

Work Experience

TatvaSoft – Web Development Intern

Ahmedabad, Gujarat (Remote) | May 2024 – May 2024

- Contributed to the development of a Virtual Community Support project.
- Used Angular for frontend, .NET for backend, and PostgreSQL for database management.
- Implemented key features like user authentication and mission tracking.

Edunet Foundation – Python Developer (SAP Environment)

Bangalore | Nov 2024 – Apr 2025

- Automated SAP-related data processing using Python scripting.
- Integrated Python-based tools to streamline backend analytics.
- Collaborated with developers to optimize workflow efficiency and improve performance reporting.

Sitaram Solution – Odoo Developer (Present)

Ahmedabad, Gujarat | October 2025

- Assisted in developing and customizing Odoo modules using Python and XML.
 - Created models, list views, form views, and window actions for business workflows.
 - Worked on debugging, testing, and improving existing Odoo applications.
 - Implemented security rules, access rights, and basic automation features
